

#### Versteeg lab

# Research technician

The Versteeg lab at the Max Perutz Labs at the University of Vienna is looking for a full-time or part-time research technician/lab manager. The position is available immediately.

### **About the Versteeg lab:**

The overarching goal of our research is to mechanistically understand how mammals degrade immune-related proteins at the correct time during the resolution phase after infection. We use mammalian cell culture model systems to elucidate the guiding principles of proteasomedependent protein degradation.

#### **About the position:**

The successful applicant will manage day-to-day operations of the research group. Tasks include: ordering, preparation and maintenance of stocks, reagent preparation, ensuring continuous lab operations, etc. In addition, there will be the opportunity to actively contribute to research projects with experimental work.

#### **Candidate profile:**

Comprehensive theoretical and practical training in molecular biology techniques such as cloning, nucleic acid purification, PCR, Western Blotting, etc. Experience in mammalian cell culture and flow cytometry is desirable, but not essential. In addition, successful candidates are highly pro-active, communicative, and team players. Excellent organizational and communication skills are essential. We are looking for a team member with the willingness to learn and develop new techniques and skills.

## **Application**

If you share our passion for investigating the mechanisms that guide correct protein degradation, and are a highly organized and detail-oriented worker with a team-oriented attitude, then we invite you to submit your application. Please include in your application:

- Your motivation letter.
- Your CV with detailed descriptions of work experience, and experience with molecular biology and cell biology techniques.
- Contact details of at least two references

#### **Contact**

Please submit your application package to: <a href="mailto:gijs.versteeg@univie.ac.at">gijs.versteeg@univie.ac.at</a>. The interviews will be held on a rolling basis; as soon as a suitable candidate is found, the position will be filled. The monthly salary will be in accordance with FWF guidelines.

Further information can be obtained from Gijs Versteeg: gijs.versteeg@univie.ac.at.

#### **About the Max Perutz Labs**

The Max Perutz Labs are a research institute established by the University of Vienna and the Medical University of Vienna to provide an environment for excellent, internationally recognized research and education in the field of Molecular Biology. Dedicated to a mechanistic understanding of fundamental biomedical processes, scientists at the Max Perutz Labs aim to link breakthroughs in basic research to advances in human health. The Max Perutz Labs are located at the Vienna BioCenter, one of Europe's hotspots for Life Sciences, and host 47 research groups, involving around 400 scientists and staff from more than 50 nations.
